TO WHOM IT MAY CONCERN

MICRONCLEAN/NANOCLEAN and their holding company T.C. KHOO & CO PTE LTD is a member of IDEMA, The International Disk Drive Equipment and Materials Association. IDEMA is a not-for-profit trade association that represents the \$22 billion Hard Disk Drive industry and its infrastructure.

We are of the view that MICRONCLEAN/NANOCLEAN is in the micro-contamination business and provides high value added services to the hard disk drive industry. MICRONCLEAN/NANOCLEAN uses state of the art technology and customers' approved processes that are critical to the quality of the hard disk drive.

The cleanroom micro-contamination services include the followings:

1. Inspection, repair and recycling of wafer boxes, media cassettes, tote boxes, reticle pods, fine wire spools for semiconductor and hard disk industries.
2. Testing of material's integrity as well as micro-contamination level of the above-mentioned products.
3. Contamination certification through the use of analytical methods such as ion Chromatography (IC), Fourier Transform Infra-Red (FTIR) Spectrometry, Liquid Particle Count (LPC), Inductive Coupled Plasma (ICP), Non Volatile (NVR), etc
4. Decontamination services of products according to customer's requirements. Clients include Seagate, Chartered Semiconductor Manufacturing, Kulicke & Soffa, Hewlett packard, Micron, etc.
5. Micro-decontamination of cleanroom apparel for semiconductor, hard disk and pharmaceutical industries. Such services extend to oversea companies in Thailand as well as China.

Yours truly,

K.Y. Phua
Managing Director

IDEMA Asia-Pacific Pte Ltd
